

Capability Statement

ENVIRONMENTAL CONSULTING

ENVIRONMENTAL CONSULTING

At Beveridge Williams, we provide tailored environmental consulting services, combining scientific expertise with advanced technologies. We offer environmental assessments and site contamination remediation, ensuring your project's success through cost-effective, science-driven solutions and strategic navigation of environmental regulations.

Our approach emphasises clear communication, rigorous analysis, and actionable results. Whether it's site assessment, remediation, or sustainability advice, we work closely with you to meet your project goals.

Our Expertise:

With decades of combined experience, our team of expert Environmental Division provides unparalleled insight and practical solutions for complex environmental challenges specialising in:

- Site Assessments
- Property Environmental Due Diligence and Risk Evaluation
- Preliminary Risk Screen Assessments (PRSAs) & Environmental Audits
- Site Remediation
- Advice Regarding EPA Regulations
- Guidelines and Notices
- Expert Witness Advice
- Environmental Services Project Management
- Risk Assessment (Environmental and Human Health)

Industry involvement:

As a founding member of the Australian Contaminated Land Consultants Association (ACLCA) Victoria, Beveridge Williams is deeply engaged in the industry.

We also maintain memberships with organisations like the Australasian Land and Groundwater Association (ALGA), Engineers Australia (EA), and the Environmental Institute of Australia and New Zealand (EIANZ) to provide up-to-date, expert advice

We are committed to our continuous improvement and actively participate in the Executive Committee and various Focus Area subcommittees, ensuring we stay current with industry practices and deliver high-quality services to our clients.

SITE ASSESSMENTS

How we can help

Our Environmental Division is dedicated to delivering thorough and reliable site assessments tailored to your project's specific needs. We offer comprehensive site assessment capabilities.

Childcare Environment Assessments

We understand the critical importance of ensuring that childcare environments are safe, healthy, and conducive to learning. In accordance with Department of Education and Training (DET) requirements, our assessments thoroughly evaluate potential environmental risks, including soil and water quality, indoor air standards, and the presence of hazardous materials.

Soil Assessments

Both preliminary and detailed—to help you identify potential contamination and inform remediation strategies.

Hydrogeological (Groundwater) & Surface Water Assessments

To ensure water quality and groundwater flow considerations are effectively managed, and monitored to help identify potential constraints, contamination sources, pathways and clean-up methods.

Acid Sulphate Soil Assessments

Assess and address potential acidity issues to minimise environmental harm and meet best practice guidelines.

Soil Vapour and Gas Investigations and Specialized Landfill Monitoring Programs

Provide essential data for risk management and regulatory adherence. Identifying and managing asbestos in soils, safeguarding health and compliance through your project timeline and goals.

OUR SERVICES

01

Property Environmental Due Diligence & Risk Evaluation

Beveridge Williams provides comprehensive property **Environmental Due Diligence and Risk Evaluation** services to support informed decision-making involving property transactions and developments.

We conduct thorough environmental assessments to identify potential liabilities, contamination, and compliance issues that could impact property value or project feasibility.

Our expert team evaluates environmental risks, assesses historical land use, and ensures regulatory obligations are met, equipping clients with the insights necessary for sound investments and sustainable development. With our diligent approach, you can confidently manage environmental risks and safeguard your assets.

02

Preliminary Risk Screen Assessments (PRSAs) & Environmental Audits

Beveridge Williams' experience in the preparation of **PRSAs** can help provide you a streamlined approach to identifying potential environmental risks early in project planning, saving time and resources by focusing on key risk areas.

Environmental Audits offer in-depth evaluations of site conditions, regulatory compliance, and environmental management practices, ensuring that projects meet strict environmental standards and support sustainable development. With our expertise, clients can confidently navigate environmental regulations and safeguard both project outcomes and environmental integrity.

03

Site Remediation

Beveridge Williams' Environmental team offers comprehensive **Site Remediation** services designed to effectively address contamination and restore sites to a suitable condition .

Remediation Scoping and Project Management, providing an end-to-end solution for contaminated site remediation. We develop comprehensive remediation scopes that outline practical, effective strategies tailored to site-specific conditions. Using our network of trusted remediation contractors, we take away the hassle of managing complex, risky, and time-consuming remediation programs.

Through our project management services oversee every stage of the process, coordinating with stakeholders, managing timelines, and controlling costs to ensure successful, worry-free outcomes so clients can trust that their remediation projects will be handled efficiently and transparently, restoring site usability while meeting all environmental standards and regulations.

Underground Tank Removal and Soil Remediation to mitigate hazardous materials at the source. For sites with impacted groundwater, our Remediation services deliver targeted solutions to protect health and environmental values.

We provide **Soil Classifications and Off-site Waste Disposal** to streamline waste handling, along with **Asbestos and Waste Separation** services to support safe and compliant site operations.

04

EPA Regulations Guidelines and Notices Advice

Our environmental division offers expert advice on navigating complex **EPA regulations**, guidelines, and notices to ensure your project meets all environmental compliance requirements. We provide tailored guidance to help you interpret and apply relevant environmental policies effectively.

Whether it's compliance planning, responding to **EPA notices**, or aligning your project with best-practice standards, our team is equipped to support you at every step.

05

Expert Witness Advice

Our environmental division provides trusted **Expert Witness Advice** for legal or VCAT proceedings involving environmental issues. With extensive experience in contaminated land, water quality, regulatory compliance, and environmental impact assessments, our experts deliver clear, impartial, and well-supported testimony.

06

Environmental Services Project Management

Beveridge Williams' **Environmental Services Project Management** provides you seamless oversight and coordination to guide your projects from conception to completion.

With a focus on efficiency, regulatory compliance, and sustainability, we manage complex environmental projects with precision and adaptability. Our experienced project managers integrate technical expertise, strategic planning, and stakeholder collaboration to ensure timely, cost-effective outcomes.

Whether overseeing site assessments, remediation efforts, or compliance initiatives and management plans, our commitment to transparent communication and proactive problem-solving ensures that every aspect of your environmental project is handled with care and expertise.

07

Risk Assessment (Environmental & Human Health)

Beveridge Williams can assist you in conducting comprehensive **Risk Assessments** that prioritize both environmental integrity and human health.

Our team evaluates potential hazards through analysis and evidence-based methodologies, identifying risks associated with contaminated land, water, and air. By considering regulatory frameworks and site-specific conditions, we provide clear, actionable insights to mitigate environmental impact and protect community well-being. Our tailored assessments empower clients to make informed decisions, ensuring projects proceed safely and sustainably while meeting all compliance requirements.
