

Beveridge Williams  
+ incorporating Clouston Associates

# Landscape Architecture

## Studio Profile

Beveridge Williams is a multidisciplinary land development practice with Landscape Architecture studios in Melbourne, Sydney and Darwin. We create projects within the private and public realm for both new and established communities, always striving to achieve enhanced user and environmental outcomes.

With a strong focus on collaboration, our interdisciplinary offices throughout Victoria, New South Wales and Northern Territory enable us to provide an informed, considered and rounded approach to design. Our intention with all works is to provide meaningful public realm spaces that respond specifically to site conditions and the needs of communities, landowners and the environment.

We take pride in providing landscape spaces that increase public amenity, support infrastructure and provide quality social, environmental and economic outcomes.

## Incorporating Clouston Associates

In 2023 Beveridge Williams were joined by Clouston Associates, a highly regarded practice incorporating the areas of Landscape Architecture, Urban Design and Landscape Planning. With 25 staff in Sydney and Darwin, Clouston bring a diverse wealth of knowledge and experience in all facets of Landscape Architecture and Urban Design. Our close collaboration and information sharing across offices further strengthens our capabilities and expertise.

## An Interdisciplinary Approach

As part of a multi-disciplinary company of more than 400 professionals across Australia, we have the advantage of having access to a wide range of in-house expertise including:

- Civil Engineering
- Infrastructure Engineering
- Traffic and Transport Engineering
- Surveying
- Project Management
- Town Planning
- Urban Design
- Environmental Assessments
- Subsurface Utility Investigation
- Strata Certification
- Water Services Coordination

Our ability to seek advice and input from our inter-disciplinary colleagues helps to facilitate and enhance landscape project outcomes.

We also have existing relationships with various Architects, Lighting Designers, Geotechnical Engineers, Access Consultants, Quantity Surveyors and others, and are able to facilitate and coordinate consultant services to meet project requirements.

## Collaboration + Innovation

We understand the value and importance of consistent collaboration between clients, stakeholders and consultants.

Our teams regularly review and critique our designs for build-ability, practicality, maintenance ease and performance. Our considerable depth of experience in contract administration allows us to assess project performance over time and incorporate learning into future design work. We are pioneering climate-positive tracking and conduct reviews of our projects which seek to minimise climate impact.

## Establishing Communities

Beveridge Williams' experience in land development has grown across 60 years, adapting to the changing requirements of both communities and environments.

We understand the dynamic role Landscape Architects have to play in designing resilient landscapes that are able to adapt and change as communities' requirements evolve.

We pride ourselves on providing well-considered public places that foster communities, encourage ownership and a instill a sense of place.

## Expertise

Beveridge Williams can coordinate and provide multidisciplinary teams to lead landscape architectural projects across both private and public works.

Our team includes experienced professionals who have skills in preparing and leading the following tasks:

- Site investigation, analysis & feasibility plans
- Marketing plans
- Landscape guidelines
- Landscape assessments
- Landscape 'Vision' reports
- Landscape master plans
- Schematic design
- Concept plans
- Landscape plans for town planning permits
- Landscape marketing plans
- Landscape detailed documentation
- Waterway and wetland design
- Tendering and contract documentation
- Contract administration
