

## Who are we?

With a legacy spanning over 65 years, Beveridge Williams is a leading multi-disciplinary and employee owned consultancy specialising in civil engineering, surveying, land development, and infrastructure. With 430+ professionals across 14 offices located in metropolitan and regional areas of Victoria, New South Wales and Darwin, we offer the flexibility to explore new locations or expand your career into related fields. Our engineers are involved in a diverse range of projects, from small-scale developments to major government and private sector initiatives.

## Our Development Program

At Beveridge Williams, our Engineering Development Program is designed to accelerate your professional growth through hands on project experience and technical development. A multi disciplinary consultancy provides a collaborative environment for graduates with exposure to the full project lifecycle and the opportunity to learn from experts across a variety of disciplines including:

- Town Planning
- Urban Design
- Surveying
- Landscape Architecture
- Environmental Engineering
- Water Resources Engineering
- Traffic and Transport Engineering

## What will you be doing?

- Contribute to the planning and design of roads, drainage, sewer, water and land development infrastructure.
- Prepare engineering documentation that meets client, statutory and quality requirements
- Assist with construction support and site surveillance
- Work closely with clients, contractors and external consultants
- Collaborate with multidisciplinary teams across the business
- Gradually take ownership of project responsibilities as your experience grows

Get the right experience to grow your career within an award winning consultancy

## Typical projects

- Small to large scale residential & industrial subdivisions
- Road & intersection upgrades
- major drainage , wetlands and waterways
- Sewer and water supply infrastructure
- Earthworks & remediation

## Why graduates choose Beveridge Williams

- Structured career pathways
- Mentoring & support
- Diverse project experience
- Inclusive workplace
- Competitive salary
- Ongoing professional development
- Employee assistance program

## Applications

We run a graduate intake in February of each year and a 12 week vacation program for undergraduates over the summer.

Follow us on LinkedIn for application openings.

## A TAILORED TRAINING PROGRAM

We run a structured two year training program for our graduates including:

- Over 100 hours of structured internal training sessions
- Fortnightly graduate meetings
- Dedicated mentor and graduate coordinator
- Monthly site visits to see your design come alive

## CIVIL DEPARTMENTS

All our engineers commence in a design department to gain a solid technical grounding. After your first year, there will be opportunities to experience rotations in our other engineering departments:

- Construction - construction management & site auditing
- Infrastructure & land development design
- Water Resources Engineering
- Traffic & Transport Engineering
- Project Engineering

At Beveridge Williams, you'll do more than develop engineering skills. You'll contribute to projects that shape communities, work alongside experienced professionals and build a career you can be proud of.
